

LEARN AND  
SUCCEED

## Regarding the Adobe Flash Player End of Life

As announced in July 2017, Adobe will stop distributing or updating Flash Player on December 31, 2020. In fact, major web browsers have already started blocking the use of this plug-in platform. Come January 2021, all Flash-based content will stop running in Flash Player.

A number of SOFAD multimedia resources will be affected by this Adobe decision. You can consult the relevant list [here](#).

In order to ensure learning continuity, SOFAD has converted all key audio and video resources so that they remain accessible. Some complementary or optional resources will also be redesigned during the course of 2021. On the other hand, resources with outdated content will be withdrawn from the SOFAD portal. Rest assured that this inaccessibility to complementary or optional content previously on offer won't in any way hinder the pursuit of the learning process or the success of learners using SOFAD learning guides.

Thank you for your understanding.
